Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/12/05 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the cited prior art fails to disclose or reasonably suggest a process of producing glass comprising the claimed steps of increasing the water content in raw material, melting the raw material to obtain molten glass in combination with vacuum degassing the molten glass wherein the pressure P of the molten glass is made to be at most $(6.1W+0.06)\text{atm}$.

Tanaka does disclose increasing the water content from 0.020 wt% to 0.028wt%. However, Tanaka's increase water content does follow the claimed relation of pressure P of the molten glass be at most $(6.1W+0.06)\text{atm}$ when the molten glass is being vacuumed degassed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
